

**BidNVest release 'catches' big attention***The newest way to save with BidGenerics.com*

**BidGenerics.com** is constantly coming up with new ways to save our pharmacists money. Now, with our economy so unstable and everybody looking to save a buck, there could be no better time for the release of our newest innovation: **BidNVest**. BidNVest was developed in cooperation with CompuSolve to work with your current ordering system, providing a comprehensive generic drug buying process that simply can't be found *anywhere* else.

Our BidNVest software installs directly onto the computer and is able to read your CompuSolve ordering history. When you place an order with BidNVest it shows you a list of all the drugs you've recently ordered, the last price you paid for them, your usage, and our BidGenerics.com low price. All that information appears on your screen in just seconds. You simply select the quantity of each drug you'd like to order and you're done—it just couldn't get any easier.

If you currently have CompuSolve you are already seeing BidNVest at work. If not, all the great savings can still be yours when you place an order at [www.bidgenerics.com](http://www.bidgenerics.com). But be patient; we hope to expand BidNVest to all of our users in the future!

**New To Our Drug Database:**

A selection of Junel (generic for Loestrin) has just been added to our extensive collection of generic drugs! Other additions include varying strengths of Kelnor and Nortrel, as well as 250 and 300 mg strengths of Naproxen and 550 mg Naproxen Sodium.

**Wholesaler contracts confuse and amuse**

Do you ever feel like you're paying your supplier too much for generic drugs? That's probably because you are. A number of pharmacists report their wholesalers have threatened them with a higher cost of goods on their brand name drugs if they (the pharmacists) don't allow the supplier the ability to sell them generics at a profit way above the competitive market place!

This behavior is what prompted the founding of BidGenerics.com in the first place. We keep seeing our pharmacists in the same position: afraid of breaking their wholesaler contract and having to pay out even more. Question—what exactly does your contract stipulate? Don't know? Know anybody who's been reprimanded because they didn't order a high enough percentage? It doesn't happen. Don't let your wholesaler intimidate you. Instead, let ours work for you.

We'll beat your wholesaler's lowest price or you don't order the drug. There are no threats, no contracts, and best of all, no cost to you.

**Seeing is believing**

Think you're getting a great deal with those faxes, flyers and phone calls you can't seem to avoid? Dare to compare. Next time you think you're getting a deal log on to BidGenerics.com and find out for yourself. You may be surprised what you find!
