

## Tips of the Month

So you've been placing orders and BidGenerics.com has been working out great for you, but you want to take your savings to the next level and start to really get the most out of the process. Use these tips to help make that happen.

**Tip #1: Make use of the Reorder Quantity Feature.** On your Order Sheet beside the Current Order Quantity field you'll see the Reorder Quantity field. This is especially handy if you have a good idea of what quantity you are pushing through your pharmacy in a given time period. Setting a quantity in this box does not place a pre-order. Instead it allows you to leave yourself a reminder of what quantity you *should* order.

**Tip #2: SUPERSAVER, SUPERSAVER, SUPERSAVER.** If you haven't tried out the SuperSAVER page in awhile you may be surprised to find out exactly how great the deals can be. You'll only see the typical percent savings when you initially select the quantity but if you know that it's a high-dollar item (and of course you'll see the final cost before you place the order), then you can end up saving *20-30-40-50 dollars per bottle* just by ordering through us.

For more great tips check through the Archives link below the *BidBuzz* icon, or as always email or call us for more detailed help using BidGenerics.com.

## We want your feedback!

***What would you like to see changed or added to the BidGenerics.com process?***

Just log in to your account and use the Suggestions box at the bottom of the page to leave a comment or suggestion. We're always trying to make your life behind the counter just a little bit easier by simplifying your buying process.
