Tip of the Month—*Maintain your Order Sheet*

BidGenerics.com was designed to work easily and efficiently to let you see the lowest prices from multiple suppliers on thousands of drugs. But there are a few things you can do to make it work even harder for you.

One such idea is to keep track of the drugs that you order the most often and add them to your Order Sheet. Even if you only order the items once a month, adding them to your Order Sheet will expedite the process.

Once a drug is on your Order Sheet, you can make edits to the drug, such as setting a reorder quantity, specifying a manufacturer and setting your Max Price.

To do this, just click on the icon (pencil, piggy bank, or light bulb) to the left of the item listed on your Order Sheet and a drug detail window will come up. The Order Sheet is your control center for placing orders so keeping it maintained is just one more way to save.
